Subject: Bridgeton Landfill Questions
Date: Friday, March 22, 2013 10:03:22 AM

Darcy and Russell – You are probably going to get tired of me asking questions about the Bridgeton Landfill, but I have more today.

The MDNR approved 111(d) plan addresses MSW landfills constructed, reconstructed or modified before May 30, 1991. The EPA MSW landfill NSPS (40 CFR Part 60, Subpart WWW) addresses landfills constructed, reconstructed or modified after May 30, 1991. Before we get any deeper into this, we just need to confirm/determine our role:

- Do you know if the Bridgeton Landfill underwent any construction, reconstruction or modification after May 30, 1991?; and/or,
- Does MDNR consider the Bridgeton Landfill subject to the EPA NSPS for MSW landfills?

Normally, I'd start by reviewing the semi annual reports that landfills submit (they usually have a brief summary as to why the reports are submitted), but I'm working from home today and don't have access to our facility files.

We are preparing for a Tuesday briefing on the subject. Any assistance you can provide is appreciated.

Thanks,

Gary Bertram
